# Health Care Bayern e.V.

**Supporting and further developing  
the Health Site Bavaria**

[www.healthcare-bayern.de](http://www.healthcare-bayern.de)

The Bavarian health care system provides considerable impulses for growth and employment. According to the Bavarian State Ministry of Health and Care, 1.2 million people work as health care professionals in Bavaria. The Free State of Bavaria provides 388 hospitals and with 260 rehabilitation clinics nearly 25% of all nationwide facilities are located in Bavaria. Unique in Germany are the 47 highly rated spas and health resorts in Bavaria. University clinics, medical research facilities and important companies in the health industry make Bavaria an outstanding site.

**Health Care Bayern e.V.** was founded in 2002 as a non-profit, non-party association. One of its main goals is to **make Bavaria known as a qualitatively outstanding Health Care Location, even beyond national borders.** An important requirement for this is an interdisciplinary information network with an effective and uncomplicated exchange of information between all those involved.

The **support and development of innovative, health-relevant projects** is a main focus of Health Care Bayern e.V. for the promotion and further development of health care in Bavaria.

More than 400 members are already involved: internationally active companies as well as Bavarian medium-sized enterprises, associations, regional authorities and committed individuals.

In currently nine different working groups, the members have the opportunity to address topics together with other interested partners, to exchange knowledge and to initiate and promote concrete projects.

## Working groups

Members of Health Care Bayern e.V. can actively participate in these working groups or, on request, simply receive information on the progress of work. The leaders of the working groups act as initiators for new topics and as guides in the solution process.
